TOBIANO COLORATION IS DETECTED THROUGH DNA LINKAGE TESTING

DATE OF DNA TESTING: 11/26/2007

ACCESS #: TOB070167

OWNER: GUN-BRITT BLOMDAHL

HORSE: ROCKING SIR PRIZE LB

REG#: 911577

SIRE: VICTIM ROCKET

SEX: STALLION

REG#: 170274

BREED: APHA

DAM: SUSPISIOUS PINES

COLOR: BAY

REG#: 690300

RESULTS: THE HORSE, " ROCKING SIR PRIZE LB " TESTED HOMOZYGOUS (TT) FOR TOBIANO PATTERN COLORATION AND SHOULD POSSESS TWO TOBIANO GENES. THIS ANIMAL SHOULD PASS THE GENE FOR TOBIANO COLORATION TO 100% OF ITS OFFSPRING. THOUGH HIGHLY ACCURATE, LINKAGE TESTING AT THIS LOCUS WILL, IN RARE CASES, EXHIBIT ABERRANT LINKAGE. THIS MEANS THAT IN A VERY SMALL PERCENTAGE OF ANIMALS, THE "T" IS LINKED TO SOLID COLORATION.
